Fish Culture.

At a late meeting of the Maryland Academy of Science, Mr. Walter B. Murdock addressed the following remarks to the Academy, on fish culture:

"A couple of months since my attention was particularly attracted by what appeared to be a new opening for a pioneer of fish in Maryland. On investigation I found but very few here realized the importance and value of the subject, and that only a few persons in the State have taken steps towards propagating and raising trout, bass, or other useful and edible fish. Desiring to ascertain the views of gentlemen throughout the country who were known to be engaged and took a deep interest in pisciculture, I addressed and received letters from Hon. Horatio Seymour, Theodore Lyman, James Rankin, E. A. Brackett, R. G. Pike, Seth Green, Dr. Slack, and many others, all of whom were unanimous in asserting that the culture of fish as a business, if properly managed, yielded the largest profits.

"B. Waterhouse Hawkins, one of the most gifted lecturers of the day, and who delivers a series of lectures on natural science before the Peabody Institute this fall, wrote that it would afford much pleasure to urge upon my audience the economic and scientific value of the subject.

"From the Department of Agriculture, in Washington, I was the recipient of a handsome bound report of 1868, which contains an interesting article on fish, appropriately illustrated, also a letter from the Commissioner of Agriculture assuring me of the interest taken in the matter by the government and himself. Gov. Bowie, in his message to the Legislature at the last session, says that 'secondary to our oyster fisheries, but of equal interest to the interior counties of the State, are the river fisheries of shad, herring, and other fish. These, of great value, have gone to decay; hundreds of dollars annually, will now scarcely yield hundreds of pounds. The cost of cured fish is fully five hundred per cent, in excess of what it was forty years ago. Maryland, from having been a large exporter, has become an importer of fish.

Through the instrumentality of the Governor, Judge R. B. Roosevelt, of New York, delivered a highly interesting lecture in Annapolis before the Legislature, prior to its adjournment. From the interest taken, and by the influence of our worthy Governor, the Legislature appropriated \$2,000 for defraying expenses incurred by the commission in stocking the waters of this State with fish. So far nothing has been accomplished, or is even under way, owing to the difficulty experienced by the Governor in getting gentlemen who, by practical experience, have the capacity for filling the position. One person has lately been determined upon, and the other, probably, soon will be, so we may early look for active operations. I would advise all who have suitable ponds, streams or fountains of water to procure at least a few black bass. He is a hardy breeder, ranks second to the brook trout, and by some is considered superior. It is best adapted to our waters, requires but little care beside feeding, and protects its young, which the trout does not. It can be obtained at Harper's Ferry, Williamsport, Hancock, Cumberland, and almost any place along the upper Potomac."—*Bull. Sum.*

It is proposed that Virginia take similar action on this subject of fish culture with the State of Maryland; that a similar Commission, and appropriation be made by our Legislature at its next meeting in December; that the two Commissioners may act jointly, together with the aid of the proper Department at Washington; that a practical experiment in pisciculture be made during the Spring of 1871, in this neighborhood on shad and herring roe taken from these fish and brought to this market.

A petition has been drawn up and will be presented to our citizens for signature, with the hope that all, without hesitation, will sign it.

BALLOONS.—In our civil war, Mr. Lowe, a well-known aeronaut, went up at Washington, in a balloon, and actually telegraphed from the clouds, to President Lincoln, that he had a view nearly fifty miles in diameter. Gen. McClellan had important information from Mr. La Mountain, another aeronaut, in September, 1861, who rose a mile and a half high, and, drifting over the Confederates' position, observed all their movements. He was fired at, but escaped, and, rising to the height of three miles, met a fresh current of air, which carried him over Maryland, where he descended. It was said that, had he retained chief command of the army, he would have organized a fleet of six or eight balloons.

During the present war in Europe not only have observations been made and letters sent in balloons, but at least one Minister of State has taken a voyage in one of them. It is easy enough to have Paris in a balloon, but difficult to land in that city. Out of all the balloons sent off by the Parisians only five have fallen into the enemy's hands. The "rule of the road" in this sort of travel, when the current is drifting the balloon in a direction not desired, is to throw out a little ballast, and rise to a greater height, until another or more favorable current of wind is reached. To do this no very considerable height need be attained. The highest point ever reached (by Mr. Glaisher and Mr. Coxwell, in mid-England, on September 5, 1852) was 37,000 feet—say, seven miles. But both aeronauts became insensible, and narrowly escaped death in the difficult air of that immense distance from the earth. The balloon service is likely to be continued in Paris while the siege lasts. Already thousands of letters have been sent all over Europe through its instrumentality."—*Washington Chronicle.*

(Grad. of Balt. College of Dental Surgery, 1847)
CORNER PRINCE & WASHINGTON STS., ALEXANDRIA, VA.
Dr. L. respectfully informs the public that for twenty years he has given special attention to the preservation of the natural teeth, and will continue so to do, and invites those who wish to save them to call on him, knowing that many are extracted and destroyed that by proper treatment might be preserved and made useful for life. Artificial teeth inserted only as approved by PROFESSORS and COLLEGS.
nov 23—1f

SPECIAL.—In calling attention to my removal, I am pleased to present my acknowledgments to my many friends for their consideration and encouragement. Being compelled by increase of business and want of room to seek larger quarters, I would announce that I am now prepared for business with an extraordinary stock of

FANCY GOODS AND NOTIONS, in the large building for so many years occupied by Bryan, Adams & Co. It having been thoroughly renovated and modernized. Now that my facilities for a more extended business have been greatly augmented, I would state that still greater inducements to encourage trade will be offered; the old and wise maxim of "Quick sales and small profits" will be strictly adhered to; and that in the future as in the past every effort will be made to satisfy my friends that I have a consideration for their interest as well as my own.
CHAS. W. GREEN,
nov 17 76 King street.

MEDICAL.

BALTIMORE LOCK HOSPITAL.
DR. JOHNSTON, Physician of this celebrated institution, has discovered the most Certain, Speedy, Pleasant and Effective Remedy in the world for all DISEASES OF IMPRUDENCE.

Weakness of the Back or Limbs, Strictures; Affection of the Kidneys or Bladder; Involuntary Discharges; Impotency; General Debility; Nervousness; Dyspepsia; Anger; Low Spirits; Confusion of Ideas; Palpitation of the Heart; Trembling; Dimness of Sight; or Giddiness; Disease of the Head, Throat, Nose or Skin; Affections of the Liver, Lungs, Stomach or Bowels; or any of the Disorders arising from Solitary Habits of Youth—secret and solitary practices more fatal to their victims than the song of the Sirens to the Mariners of Ulysses, highlighting their most brilliant hopes or anticipations, &c.

YOUNG MEN Especially, who have become the Victims of Solitary Vice, and dreadful and destructive habits which annually sweep to an untimely grave thousands of young men of the most exalted talents and brilliant intellect, who might otherwise have entered the list of Senators with the thousands of eloquence, or waked to ecstasy throbbing lyre, may call with full confidence.

MARRIAGE. Married persons, or Young Men contemplating marriage, aware of Physical Weakness (Loss of Procreative Power—Impotency), Nervous Excitability, Palpitation, Irritability, Nervous Debility, or any other Disqualification, speedily relieved.

He who places himself under the care of Dr. J. may religiously confide in his honor as a gentleman, and confidently rely upon his skill as a physician.

ORGANIC WEAKNESS. Immediately cured and Full Vigor Restored. This distressing Affection—which renders life miserable and marriage impossible—is the penalty paid by the victims of improper indulgences. Young persons are too apt to commit excesses from not being aware of the dreadful consequences that may ensue. Now, who that understands the subject will pretend to deny that the natural powers are lost sooner by those falling into improper habits than by the prudent? Besides being deprived of the pleasure of healthy offspring, the most serious and destructive symptoms of a single, indiscretion, Constant Debility and Wasting of the Frame, Cough, Consumption, Decay and Death.

A CURE WARRANTED IN TWO DAYS. Relief in Six Hours! No Mercury! Persons ruined by Ignorant Trifling Pretensions and their Deadly Poison, should apply immediately.

DR. JOHNSTON, Member of the Royal College of Surgeons in London, Graduate of one of the Universities of the United States, and the greatest part of whose life has been spent in the hospitals of London, Paris, Philadelphia and elsewhere, has effected some of the most astonishing cures that were ever known; many, troubled with nervousness, being alarmed at sudden sounds, bashfulness, with frequent blushing, attended sometimes with derangement of mind, were cured immediately.

TAKE PARTICULAR NOTICE. Dr. J. addresses all those who have injured themselves by improper indulgence and solitary habits, which ruin both body and mind, unfitting them for either business, study, society or marriage.

These are some of the sad and melancholy effects produced by the early habits of youth, viz: Weakness of the Back and Limbs, Pains in the Head, Dimness of Sight, Loss of Muscular Power, Palpitation of the Heart, Dyspepsia, Nervous Irritability, Derangement of the Digestive Functions, General Debility, Symptoms of Consumption, &c.

MENTALLY.—The fearful effects on the mind are much to be dreaded. Loss of memory, Confusion of Ideas, Depression of Spirits, Evil Forebodings, Aversion to Society, Self-Delusion, Loss of Solitude, Timidity, &c., are some of the evils produced.

Thousands of persons of all ages can now judge what is the cause of their declining health, losing their vigor, becoming weak, pale, nervous and emaciated, have a constant apprehension about the eyes, cough and symptoms of Consumption.

YOUNG MEN Who have injured themselves by a certain practice, already described, a habit frequently learned from evil companions or a school, the effects of which are nightly felt, even when asleep, and if not cured, renders marriage impossible, and ruins the mind and body, should apply immediately.

What can a young man, the hope of his country, the pride of his parents, should be snatched from all prospects and enjoyment of life by the consequences of deviating from the path of nature, and indulging in pernicious habits. Such persons must, before contemplating

MARRIAGE. Reflect that a sound mind and body are the most necessary requisites to promote conjugal happiness. Indeed, without these the journey through life becomes a weary pilgrimage, the prospect hourly darkens to the view, the mind becomes shadowed with despair, and killed with the melancholy reflection that the happiness of another is blighted by their own.

DISEASE OF IMPRUDENCE. When the misguided and imprudent votary of pleasure finds that he has imbibed the seeds of this painful and dangerous disease, that an ill-considered sense of shame or dread of discovery deters him from applying to those who, from education and respectability, can alone benefit him, delaying till the constitutional symptoms of this horrid disease make their appearance, such as ulcerated sore throat, diseased nose, nocturnal pains in the head and limbs, dimness of sight, deafness, nodes on the skin bones and arms, blotches on the face and extremities, progressing with frightful rapidity, till at last the palate of the mouth of this awful disease becomes a horrid object of commiseration till death puts a period to his dreadful suffering, by sending him to that undiscovered country "from whence no traveler returns."

It is a melancholy fact that thousands DIE victims to this terrible disease, through falling into the hands of ignorant or unskillful PRETENDERS, who, by the use of that deadly Poison, Mercury, &c., destroy the constitution, and increase their suffering, and again before their minds are cleared, and instead of being restored to a renewal of Life, Vigor and Happiness, in despair leave him with ruined Health to sigh over his galling disappointment.

DR. JOHNSTON, OFFICE, No. 7, SOUTH FREDERICK STREET BALTIMORE, MD.

left hand side going from Baltimore street a few doors into the corner. Fail not to observe name and number.

No letters received unless post-paid and containing a stamp to be used in the reply. Persons writing, should send a true and correct portion of advertisement describing symptoms

ENDORSEMENT OF THE PRESS. The many thousands cured at this Establishment, year after year, and the numerous important Surgical Operations performed by Dr. Johnston witnessed by the representatives of the press and many other persons, notices of which have appeared in his standing as a gentleman of character and responsibility, is a sufficient guarantee to the
